

# AutoBond™

## Fusion Bond Epoxy (FBE) Joint Coating System

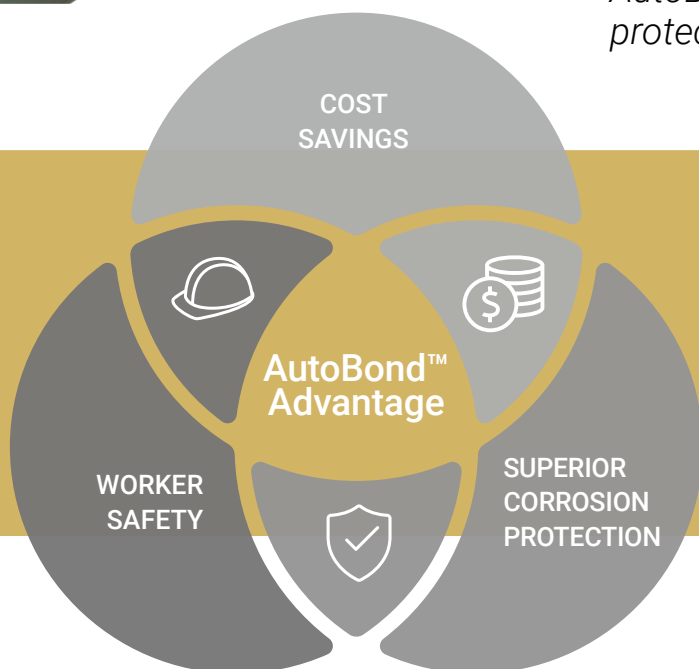

**FEATURES:** This automated field joint coating system provides quick and precise FBE application to the specified film thickness using custom software and assisted by a specially designed application head.

**RECOMMENDED USE:** The AutoBond™ can be utilized in summer and/or winter on pipeline projects NPS 12+

### ADVANTAGES

- Consistent film thickness across entire joint area
- Minimizes worker exposure to harmful materials
- Reduced environmental footprint
- Improvements over manual application
- Fewer repairs; superior corrosion protection
- Cost savings on labour and materials

*Fusion Bond Epoxy (FBE) has been the trusted solution for the harshest environments in the world. Now, the AutoBond™ makes it easy to provide that same level of protection to the field joint.*

As an established provider of field coating services, KEYMAY provides a variety of offerings:

- Full-scale mainline coating crews
- Equipment rental packages.
- NACE Certified Inspectors
- Creation of project quality plans, ITPs, application procedures and reports
- Laboratory testing plans

*Our outstanding workmanship and commitment to safety is evident in everything we do.*
